# Over 70 Cryptocurrencies: BISON Expands Offering with Eight New Coins

- **BISON expands its portfolio with eight additional cryptocurrencies**
- **The crypto trading platform's offering grows to more than 70 coins**
- **Broader selection of DeFi, digital infrastructure and community projects in the regulated environment of Boerse Stuttgart Group**

*Stuttgart, 30.07.2026* – BISON, the crypto trading platform for retail investors of Boerse Stuttgart Group, continues to expand its offering. As of now, users can trade eight additional cryptocurrencies. With the addition of DoubleZero (2Z), EUR CoinVertible (EURCV), Maple Finance (SYRUP), Pendle (PENDLE), Pudgy Penguins (PENGU), Render (RENDER), Sky (SKY) and Turbo (TURBO), the portfolio now comprises more than 70 cryptocurrencies.

"The crypto market is developing in many areas simultaneously – from decentralized infrastructure and computing power to DeFi through to community projects," says Dr. Ulli Spankowski, CEO and Co-Founder of BISON. "With the new listings, we expand the selection for our customers without compromising on regulated access. At BISON, crypto investors don't have to choose between a broad offering and a reliable trading environment."

**The eight coins at a glance**

With the expansion, BISON customers have access to eight additional cryptocurrencies. The new listings cover different areas of the crypto market:

- **DoubleZero (2Z):** Native utility token of the DoubleZero protocol, a decentralized network infrastructure for powerful distributed systems and blockchain applications.
- **EUR CoinVertible (EURCV):** Euro-denominated and MiCA-compliant stablecoin issued by Societe Generale-FORGE, a regulated subsidiary of Societe Generale.
- **Maple Finance (SYRUP):** Governance token of Maple, a platform for on-chain credit and asset management. Token holders can vote on key protocol decisions and further development.
- **Pendle (PENDLE):** Governance and utility token of a DeFi protocol that splits interest-bearing crypto assets into principal and yield components, making future yields separately tradable.
- **Pudgy Penguins (PENGU):** Official token of the Pudgy Penguins ecosystem, which emerged from an NFT collection and has evolved into a community-driven digital and consumer brand.

- **Render (RENDER):** Token of the Render Network, which makes unused graphics processor capacity available for computing-intensive applications such as 3D rendering, generative AI and machine learning.
- **Sky (SKY):** Governance token of the Sky ecosystem, through which users can participate in decisions regarding the further development of the DeFi protocol. The ecosystem evolved from the former MakerDAO.
- **Turbo (TURBO):** Community-driven memecoin that originally emerged from an AI-powered experiment to develop a cryptocurrency.

## More than 70 cryptocurrencies tradable in a regulated environment

There are no trading fees on BISON, only the spread applies. Custody is provided by Boerse Stuttgart Digital Custody GmbH, a regulated subsidiary of Boerse Stuttgart Group, which became the first German crypto custodian to receive the EU-wide MiCAR license. The crypto custodian has implemented a multi-level security concept with an integrated crime insurance policy, which covers stored coins against theft, hacker attacks, and other risks, and applies to hot, warm, and cold wallets.

**About BISON**
